*Zenith Zoysia®* is the first synthetic cross zoysiagrass and the result of years of research. First introduced in 1990, this unique zoysiagrass sod is also available in seed form. *Zenith Zoysia®* provides a dark-green, medium-textured turf for use in home lawns, commercial landscapes, golf courses, sports fields and roadsides from Miami to Baltimore and west to Kansas City and beyond.

- **Best adapted turf for the transition zone**
- **Low water requirement**
- **Low nutrition requirement**
- **Winter hardy**
- **Less frequent mowing required — from 1 to 2 inches — with either reel or rotary mowers**
- **Dense turf resists weeds**

*Zenith Zoysia®*, available in both sod and seed, can be installed easily and provides a superior low maintenance lawn.
